Stocked Product Details

Football grass

GF-5082

Appllcation : Football grass
Materlai : PE + PP
Grass height : 50mm
Gauge : 5/8
Backing : PP + Net + SBR
Color : Light or dark green
Density stitches /m² : 10500
Dtex : 8200

Landscape Grass

GL-3075

Appllcation : Landscaping grass
Materlai : PE + PP
Grass height : 20mm
Gauge : 3/8
Backing : PP + Net + SBR
Color : 3 colors green
Density stitches /m² : 14700
Dtex : 7500

GF-50105

Appllcation : Football grass
Materlai : PE + PP
Grass height : 50mm
Gauge : 5/8
Backing : PP + Net + SBR
Color : Football grass
Density stitches /m² : 10500
Dtex : 10500

GL-2021

Appllcation : Landscaping grass
Materlai : PE + PP
Grass height : 20mm
Gauge : 3/8
Backing : PP + Net + SBR
Color : 3 colors green
Density stitches /m² : 21000
Dtex : 6500

GL-3075s

Appllcation : Landscaping grass
Materlai : PE + PP
Grass height : 30mm
Gauge : 3/8
Backing : PP + Net + SBR
Color : 3 colors green+1 color yellow
Density stitches /m² : 16800
Dtex : 7500

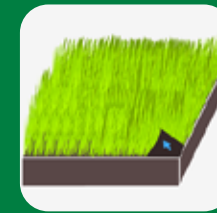

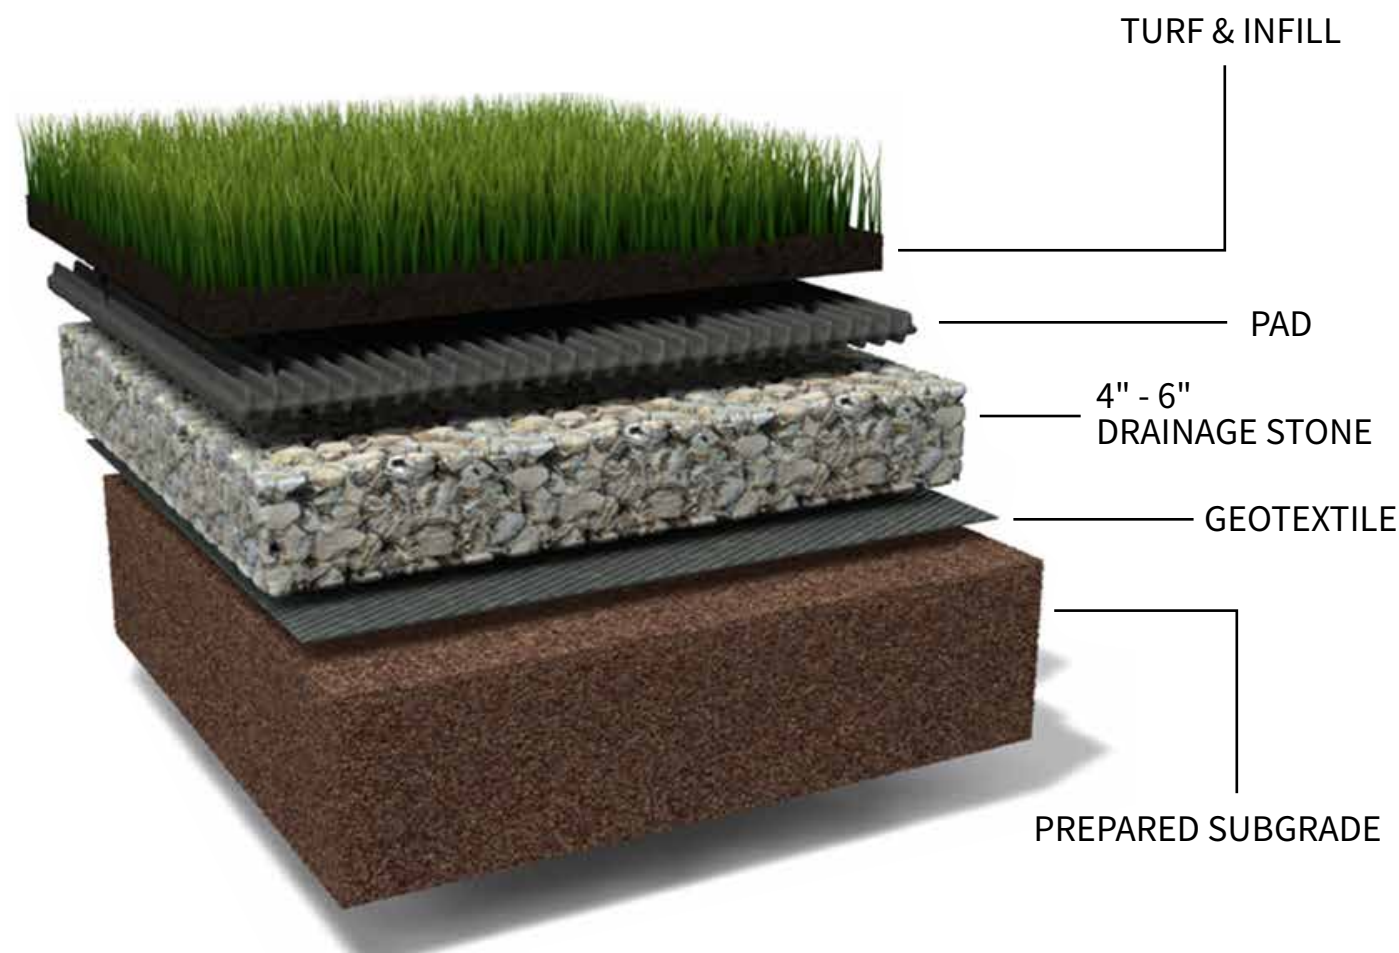

GF-50135

Appllcation : Football grass
Materlai : PE + PP
Grass height : 50mm
Gauge : 5/8
Backing : PP + Net + SBR
Color : Football grass
Density stitches /m² : 10500
Dtex : 13500

*Customized Specifications Available

Laying Methods And Techniques

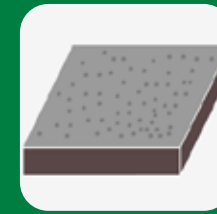

【 Suitable laying improves the efficiency 】

①

Remove Sod

We dig down 4"-6" and remove the existing grass.

②

Install Foundation

We build a perimeter and border around the designated Area. Then we lay the crusher dust foundation rock and Tamper it to ensure its compact and secure.

③

Install Synthetic Grass

We lay the synthetic grass in a way that makes the Grass fibres look the best.

④

Secure Seams

We use a synthetic grass specific tape and Glue to ensure the seams are not visible.

⑤

Secure the Grass to the Foundation

We spike the perimeter of the Grass using 7" spikes to ensure it is secure.

⑥

Install Infill

Lastly, we lay a silica sand or zeolite infill and use a Power broom to ensure the grass Blades are standing up right.
